

# CLINICAL OUTCOMES SOLUTIONS

**Innovative science to capture  
the patient voice**

Our team of experts will provide you with the most effective clinical outcome solution to help you make the right patient care value decisions. We have expertise in qualitative and quantitative research that will result in actionable evidence to support your clinical and regulatory strategy for both the US and European markets.

# THE SENIOR LEADERSHIP TEAM

Clinical Outcomes Solutions is headed by Stacie Hudgens and Tara Symonds.

**Stacie Hudgens**

President –  
Principal Scientific Advisor

**Tara Symonds**

Managing Director (UK) –  
Principal Scientific Advisor

Our senior leadership team includes highly-skilled qualitative and quantitative experts. Our philosophy is to be responsive, honest and efficient thus, alongside Stacie and Tara, our strategic leaders work hands-on with the project teams to provide dedicated, continuous support across all facets of clinical outcomes research.

The senior leadership team is supported by Senior Scientists and Researchers.

**Fabian Cordova,  
CPA, MBA**

Senior Vice President,  
Operations

**Helen Doll  
DPhil**

Executive Director,  
Quantitative Science

**Claire Burbridge  
MSc**

Executive Director, Clinical  
Outcome Assessments

**Jennifer Beaumont  
MS**

Executive Director,  
Quantitative Science

**Libby Floden  
PhD**

Senior Director,  
Quantitative Science

**Alex Barsdorf  
PhD**

Senior Director, Clinical  
Outcome Assessments

**Amy Howerter  
PhD**

Senior Director,  
Prospective Studies

**Rebecca Cheng**

Senior Director,  
Psychometrics

# INNOVATIVE SCIENCE TO CAPTURE THE PATIENT VOICE – KEY SERVICES

Clinical Outcomes Solutions supplies expertise in qualitative and quantitative research that results in actionable patient-centric evidence to support clinical and regulatory strategy and inform patient care value decisions.

Focusing exclusively on the generation of clinical outcome assessments (COAs) evidence, with specialized expertise in measuring, understanding and communicating patient-centered outcomes (eg., patient reported outcomes (PROs), clinician-reported outcomes (CROs), observer outcomes) in regulatory and real-world clinical development activities.

Featuring a team with rich capabilities in quantitative and qualitative research, analysis, and medical communications from strategy through market access.

Finding the most effective solutions to your research needs with dedicated services across all facets of clinical outcomes research:

## **Clinical Outcome Assessment Strategy**

COS provides extensive regulatory and payer support in the U.S. and E.U., from evidentiary document development and submission to meeting attendance and presentations.

## **Clinical Outcome Assessment Methods**

With experience in various COA methodologies, COS assists in the design and conduct of observational, prospective real-world studies in both rare and common conditions, including recruitment and screening of participants, document development, and data collection and analysis. COS also specializes in mixed methods research and qualitative exit interviews.

## **Outcome Analytics**

Informed by extensive expertise, COS provides psychometric and statistical support, as well as COA evidence generation. Examples include COA analytic strategy, quantitative prospective studies, clinical trial analyses to support New Drug Applications, outcome analytics for payer evidence (market access requirements), and development of clinical trial protocols and SAPs.

## **Medical Communications**

COS offers personalized support of medical communications development from a senior scientific perspective including reporting, data presentation, and regulatory documentation.

# ONCOLOGY OUTCOMES

## STRATEGIC ADVISORY PARTNERSHIP

The oncology-focused research partnership led by Stacie Hudgens, provides our clients with cutting edge solutions and methodologies in all areas of oncology and delivers the most innovative patient-related strategies.

Our team of oncology outcome experts will support you on every step of the journey: from early development to post-approval, including real world surveillance. We understand what you will need to demonstrate the value (or clinical benefit) of your product to key stakeholders including patients, providers, regulators, and reimbursement authorities and we have the expertise to ensure the optimal solution is provided to you.
